

Terminal 009 Tanjung Priok Jakarta, Indonesia

Terminal 009, Tanjung Priok Jakarta, Indonesia

Through its subsidiary, PT Serbaguna Terminal, Portek has a concession to operate the equipment at Terminal 009, which is located in the heart of Tanjung Priok Seaport – the largest port in Indonesia. Current throughput at Terminal 009 is about 280,000 TEUs yearly.

Capacity:

350,000 TEUs

Equipment:

4 Panamax quayside gantry cranes

11 rubber-tyred gantry cranes

Facilities:

400-meter quay (two berths)

8-hectare container yard with reefer facility

Water Depth:

8.5 meters

Key Shipping Lines:

OOCL, PACC Container Line, Caraka Tirta Perkasa Line, and Temas Line

Considering its size, throughput at T009 is remarkably high.

Ongoing maintenance and predictive techniques have resulted in equipment reliability above 95%.

Local personnel have received Portek training as service technicians and engineers.

The terminal has been configured to accommodate Asia's robust growth in container traffic.
